Education

Rajkumar Goel Institute of Technology, Ghaziabad <i>B.Tech in Computer Science and Engineering (7.12 CGPA)</i>	2022–2026
Kendriya Vidyalaya Afs, Gorakhpur (Uttar Pradesh) <i>12th - Central Board of Secondary Education (71.6%)</i>	2021–2022
Kendriya Vidyalaya Afs, Gorakhpur (Uttar Pradesh) <i>10th - Central Board of Secondary Education (73.8%)</i>	2019–2020

Experience

InterviewIQ AI – AI-Powered Interview Preparation Platform || Personal Project

React.js, Node.js, Express.js, MongoDB, and Gemini AI

- Independently designed and built a full-stack web application end-to-end using the MERN stack, integrating a third-party AI service (Gemini API) via REST APIs, with secure JWT authentication and bcrypt-encrypted password storage.
- Built a resume-parsing pipeline that extracts text from uploaded PDFs and processes it through custom REST endpoints for job-description matching.
- Engineered backend logic and prompt pipelines to generate personalized technical/behavioral interview questions and skill-gap analysis reports.
- Designed and implemented RESTful APIs and normalized MongoDB (NoSQL) schemas to manage users, reports, and report history.
- Built a responsive React.js frontend consuming these APIs, covering resume uploads, dashboards, and report visualization.
- Used Git/GitHub for version control throughout development.

Projects

Employee Management System (EMS)

React.js, Tailwind CSS, React Router, Context API

- Built a full-stack employee management system with role-based dashboards (Admin/Employee), implementing secure, differentiated access control via protected routes.
- Developed backend REST APIs to create, assign, and track tasks, with real-time status updates (New, Active, Completed, Failed).
- Designed the frontend architecture using reusable, scalable React components and state management with Context API.
- Managed the project independently using Git for version control and iterative feature development.

Shoppulse

React.js, Node.js, Express.js, MongoDB, Firebase Auth, Tailwind CSS, and RESTful APIs

- Developed a full-stack e-commerce platform using React, Node.js, Express, and MongoDB, integrating third-party services including Stripe (payments) and Firebase Auth (authentication).
- Designed and consumed RESTful APIs for product browsing, cart management, secure checkout, and order processing.
- Built an admin dashboard backed by REST endpoints for product and order management, working independently through the full development lifecycle.

Technical Skills and Interests

Languages: C, C++, JavaScript, SQL, Python.

Frameworks: React.js, Node.js, Express.js, Tailwind CSS.

Developer Tools: Git, GitHub, Visual Studio Code.

Computer Science Fundamentals: Data Structures and Algorithms, Object-Oriented Programming (OOP), Operating Systems, Computer Networks, Database Management Systems (DBMS).

Achievements

-
- Enhanced coding efficiency by solving 200+ DSA problems on GeeksforGeeks and LeetCode.

Certifications and Online Courses

-
- Completed certification in “The Joy of Computing using Python” from NPTEL, gaining expertise in Computational Thinking.
